The inventions relating to claims 1 and 4-5 do not appear to involve an inventive step based on documents 1-3 cited in the ISR. Applying the drive method described in document 3 (paragraph 35, Fig. 7) wherein when a lookup table is to be switched by temperature, a hysteresis characteristic is given to the overdrive drive method described in document 2 (see claims 1-4, paragraphs 45-48, Fig. 1), and thereafter to document 1 would be easy for a party skilled in the art.

The invention relating to claim 3 does not appear to involve an inventive step based on documents 1-3 and document 4 cited in the ISR. Employing interpolated data when using a lookup table is a well-known matter, as can be seen from the descriptions in document 4 (paragraph 27); therefore, applying this to the overdrive drive method described in document 2, and thereafter to document 1 would be easy for a party skilled in the art.

The inventions relating to claims 6 and 7 do not appear to involve an inventive step based on documents 1-4 and documents 5-6 cited in the ISR. Using both interpolated data and non-interpolated data is a well-known matter as can be seen from the descriptions in document 5 (paragraphs 33 and 39) and document 6 (paragraph 35); therefore, applying this to the overdrive drive method described in document 2, and thereafter to document 1 would be easy for a party skilled in the art.
